Program Description

- Each participant chooses a project to work on alongside with MIT faculty
- Learn about a wide range of research in materials science
- Awards include $6500 stipend and round-trip travel expenses
- The program is open to students who are U.S. citizens or permanent residents and are entering their junior or senior year in September, 2018

Eight week program runs June 17-August 11, 2018

Project Areas May Include

- Materials for electronics, communications & micro photonics
- Advanced ceramics & magnetic materials
- Metals, polymers & ceramic composites
- Mathematical modeling
- Biomaterials & polymers
- Electrochemical processing; batteries; surfaces; interfaces
- Energy generation and storage
- Active materials

Fields of Study

- biology
- physics
- chemistry
- civil engineering
- chemical engineering
- nuclear engineering
- electrical engineering
- aeronautical engineering
- mechanical engineering
- materials science & engineering
- and other cutting-edge fields

Funded by the MIT Materials Research Laboratory and the Center for Materials Science & Engineering, a National Science Foundation Materials Research Science and Engineering Center, through the NSF REU Program. MIT is an equal opportunity employer. Women, minorities and persons with disabilities are encouraged to apply.
