Ready to compete for prizes and glory for your school? Join our 18th annual TECHNO-BOWL competition for local high school students. Your school should be there!

When: Saturday, April 21st, 2018; 9:00 AM (check-in begins at 8:30 AM)
Where: University of Washington, Seattle Campus (hall/rooms TBD)

What is TECHNOBOWL?
TECHNOBOWL is a Jeopardy-style competition. Questions include topics like math, engineering, chemistry, biology, and the history of science. This is a chance for your students to apply what they’ve learned in the classroom, talk with professionals in the public and private sector about jobs in engineering and the sciences, and win prizes as they compete to be the top school for 2018. With competitors and coaches from high schools throughout Western Washington, the competition is challenging and unpredictable to the end. The contests are run in a round-robin with elimination finals, with many of the contests very close.

Why participate in TECHNOBOWL?
Aside from the fun of the competition and face time with local engineers, scientists, and the UW community, there are prizes! All competitors get participation prizes, handouts, and goodies while the top 3 teams receive larger prize donated by local and national companies. Last year the top teams got Raspberry Pi starter kits, TI-84 graphing calculators, and Amazon gift cards. This is a great event for students to show off their brain power and is a must do for students interested in engineering and science related fields. Only 15 Teams will be accepted for the competition, on a first-come first-admitted basis.

How do I sign up for TECHNOBOWL?
All you need is at least one coach (teacher/parent/responsible adult) and up to four students to make up a team. Subject to the number of responding schools, multiple teams from a single school may be allowed. To register, contact Dave Walt at davewalt83@gmail.com to receive our information packet of rules, sample questions, and other details. Space is limited, so submit your application as early as possible.

The Society of American Military Engineers is committed to helping produce a first-class experience for all participants. We want you!
